## Film Show on Global Warning

A documentary film was shown to the B.Sc. students on global warning which takes a sobering look at the Antarctic region, revealing the devastation to both life and land caused by global warming.

### Title :The Antarctica Challenge: A Global Warning

The Antarctica Challenge: Mary Terry combines breath-taking cinematography with factual scientific data, expert interviews, and historical records, to open our eyes to the realities of how our actions are negatively impacting our earth. It is no wonder the film has won eleven (or more!) international film festival awards and was featured at the United Nation's Climate Change Summit in Copenhagen. And today, The Antarctica Challenge - A Global Warning continues to be featured at universities and educational institutions across Canada and around the world.

## Film Show on Our Planet

A documentary film was shown to the B.Sc. students on our planet to experience our planet's natural beauty and examine how climate change impacts all living creatures.

**Title: Our Planet**

The series addresses issues of conservation while featuring these disparate animals in their respective home regions, and has been noted for its greater focus on humans' impact on the environment than traditional nature documentaries, centering around how climate change impacts all living creatures
